SAYLORVERSE

WHITEPAPER

- Welcome to Saylorverse; the first anime project of BSC that wants to change the lives of its holders.
- We want to offer a safe place for their investments and develop a project where they can do use of their coins, as well as earn income both actively and passively.
The anime world grows up impressively every year, that´s why our project wants to incorporate it into your space art and entertainment.
- We also have a large community with more than 30,000 holders at the moment who are continuously supporting us in this amazing project.

SAYLORVERSE

WHITEPAPER

- Saylorverse is an ecosystem of tokens made up of:
- SaylorMoon (SMOON).
this is the main token and the one that will be the most useful. With this token, you can acquire NFT in our NFT anime marketplace, among other future utilities.
- Saylorcake (SCAKE).
Was born to help our SaylorMoon with a system of purchase and burning of tokens. With their rewards model with Cake, our holders increase their income passively.
- SaylorBNB (SBNB).
It is the next token in our system whose pre-sale will take place soon, and that it has among its functions to reward our holders with BNB.

WHITEPAPER

- Our first objective is to develop our own NFT anime Marketplace in the best possible for our users. Where you will find masterpieces of art by our Saylor, some of which will be unique works. In addition, users will be able to unleash their talent by offering their anime NFT's in our space.
- In the middle of the next year 2022, we will have a swap and a swap application whose main purpose is to facilitate the work of our users, being able to buy and sell our tokens in the easiest way possible avoiding exorbitant fees. Also, you will be able to swap the main market currencies (coins).
- Next year will be a great year for Saylorverse! we will enjoy our first game NFT having fun and more likely our holders will earn income actively. Earn income and have fun? what a fantastic system!
